

IRON & STEEL / FOUNDRIES – INDIA

Produkte für Eisen- und Stahlgießereien

—
Products for Iron and
Steel Foundries

There for you, wherever you need us

The more closely we work with our customers, the greater the impact we can make for them. So a global network of offices, research centers, and production sites is important to us, and to them. We are continuously extending our global reach to be closer to even more customers.

Being closer to customers doesn't just mean we can be more responsive to their needs. It also helps us to listen better — to understand their concerns, cultures and ways of working. It makes us alert to new ways of thinking and ideas that enable us to deliver even better advice, services, and solutions.

Our exceptional resources and expertise extend far beyond making and selling products. We provide solutions to customers worldwide for cover projects, material specifications, thermal studies, numerical simulations, follow-ups and technical support in application of minerals as well as maintenance and electromechanical services for refractory equipment.

IRON & STEEL / FOUNDRIES – INDIA
